01 EXPERIENCE

LBA Consulting, a TXT Group company

Borgomanero, Italy · Hybrid

Software Developer · front end and .NET APIs — July 2026 – Present

- Contributed to the Angular component library on top of DevExtreme that a management software is built on: part of its front end and, since 2026, its ASP.NET Core and Entity Framework Core APIs; the first version is released.
- Contributed to the front end and API of a merchant onboarding portal for a payments company that replaces a long paper registration for POS terminals and meal vouchers with a step-by-step online flow, now live in testing with selected merchants.
- Take features from client request and analysis to development, testing and support in a five-person team.

Software Developer · SQL and front-end focus — February 2023 – July 2026

- Designed in Figma and built most of a reservation platform for guided visits and events across several estates, from booking flow to back office, in Angular, DevExtreme and SQL Server; still in use, with ongoing maintenance.
- Designed the UI and UX of a B2B portal where agents book visits for their clients instead of by phone or email, contributed to its development and to its rebrand in 2026; SQL Server emails each booking summary to the visit manager.
- Wrote SQL Server queries, views and stored procedures for a management software in production with many clients, and contributed to an Angular app for a retail distributor to manage supplier contracts.

NSS Magazine (nss factory)

Milan, Italy

Junior Front-End Developer (Internship) — 2022

- Developed the front end of editorial and brand pages for nssmag.com in HTML, Sass and jQuery on the in-house CMS, including a scroll-driven GSAP page for Gucci and long-form features for Baracuta and NSS Sports.
- Developed interactive Google Maps guides placing every show of Milan Fashion Week and Paris Fashion Week Men by its coordinates.
- Created a CMS article category so editors fill “The Italian Streetwear” section on their own, and maintained client e-commerce sites with Vue.js and basic PHP (Laravel).

02 PROJECTS

NightSky · Personal portfolio — 2026 – Present

- Designed in Figma and built in Angular a bilingual portfolio whose home is an explorable galaxy map, with a list-view alternative, prerendered pages and reduced-motion support.
- Set up Playwright end-to-end tests on desktop and mobile and a GitHub Actions pipeline that deploys to GitHub Pages.

03 LANGUAGES & TECHNOLOGIES

Front end	Angular, TypeScript, JavaScript, HTML, CSS, Sass, DevExtreme, Angular Material, responsive layouts
Back end & data	SQL Server (queries, views, stored procedures), ASP.NET Core REST APIs, Entity Framework Core
Tools	Git, GitHub Actions, Playwright, Figma
